DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 55, 64, and 73 are rejected under 35 U.S.C. 102(e) as being anticipated by Kurashige (US 6088487).

Kurashige discloses the image processing method, apparatus, system, and software for modifying a first image to obtain a second image on the basis of a first signal obtained by extracting an edge of a first image (col. 2, line 37 to col. 2, line 35), and a second signal obtained by reducing the number of tone levels (col. 3, lines 36-44), which inherently increases brightness.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 21, 25, 30, 57, 59-60, and 67-71, 74, and 76 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kurashige as applied to claims 1, 55, 64, and 73 above, and further in view of well known prior art (MPEP 2144.03).

While Kurashige does not disclose the first image being a photo (claim 21), output of the second image onto a recording medium (claims 25, 57, 67, and 76), user input to select image modification modes including a monochromatic conversion mode (claims 30, 59-60, 71, and 74), and image input device such as a digital camera or scanner for input of the first image (claims 68-70), these are all notoriously well known features in the prior art.

It would have been obvious to one of ordinary skill in the art to have provided the well known features recited in the claims as indicated above in Kurashige in order to have wider application for input image sources and output image media, and to allow user control to achieve improved output results according to the user's desires and sensitivities, and desired output.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 775 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Allowable Subject Matter

Claims 2-20, 22-24, 26-29, 31-54, 56, 58, 61-63, 65-66, and 72 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
